(54) RESIN COMPOSITION, ITS PRODUCTION, AND LAMINATE

(57)Abstract:

PURPOSE: To provide a resin composition excellent in transparency and improved in gas barrier properties.

CONSTITUTION: The objective resin composition consists of an ethylene/vinyl alcohol copolymer (EVOH) having an ethylene content of 20-60mol% and a water-swelling phyllosilicate and in which the basal plane spacing of the phyllosilicate dispersed in the EVOH satisfies the relation: $(x-y) \geq 2$, wherein (x) is the basal plane spacing (angstrom) of the phyllosilicate uniformly dispersed in the EVOH, and (y) is that of the dry powder of the phyllosilicate.
